Dear Dave

I'd be very grateful if you could help with the procurement of some emergency personal protective equipment for the hospital, via your professional channels.

We are desperately in need of N95 / P2 disposable masks, nitrile gloves and whole body protective suits.

Our stocks are low and with the expecting influx of sick and infected patients, we need to protect the medical workforce so that they can continue with their jobs.

If any industry, anywhere in the country has available stocks of this PPE equipment can you please donate to your local hospital, they may not be able to reach out to you at the current time.

Thanks again for any assistance you can provide,

Best wishes

Dr Suki Ahluwalia
